SEE WHAT'S **NEW**

CGM LYTEC
Practice Management and EHR

CGM LYTEC is a trusted and affordable practice management solution built to simplify the way you run your practice.

With each release, **CGM LYTEC** gets more capable—new layers of functionality and usability, year after year.

See what **CGM LYTEC** 2027 can do for you.

Revenue Management, built for speed

Posting remits is repetitive work.

Let **CGM LYTEC** 2027's Revenue Management tools take some of that repetition off your plate.

A new preference automatically checks patient responsibility lines when you're posting a secondary remit—no more clicking through line by line. AR status codes can now be assigned directly within an ERA, so your team's next steps are visible at a glance.

To make things easier, Revenue Management even remembers your window sizes and positions between logins, so it's set up the way you left it every time you come back.

A smarter, faster front desk

Small friction points add up over a full day at the front desk. **CGM LYTEC** 2027 removes a few of the most common ones.

A default provider for every schedule resource

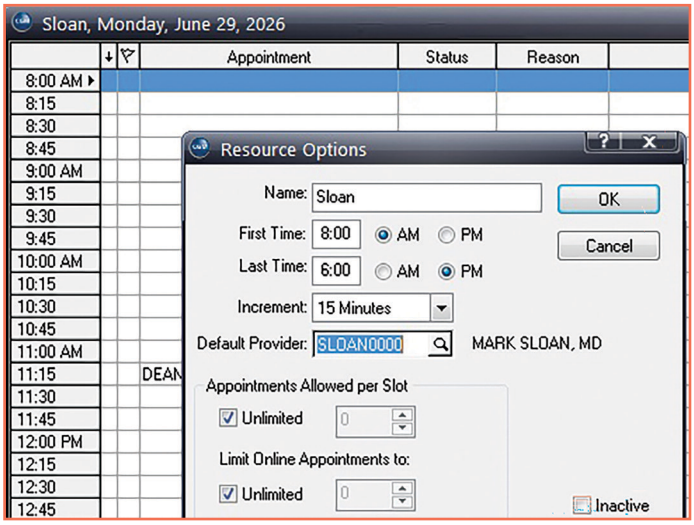

Assign a default provider to a schedule resource so the right provider is set automatically when you need it. Cut the manual work and eliminate errors.

Prepayments without changing screens

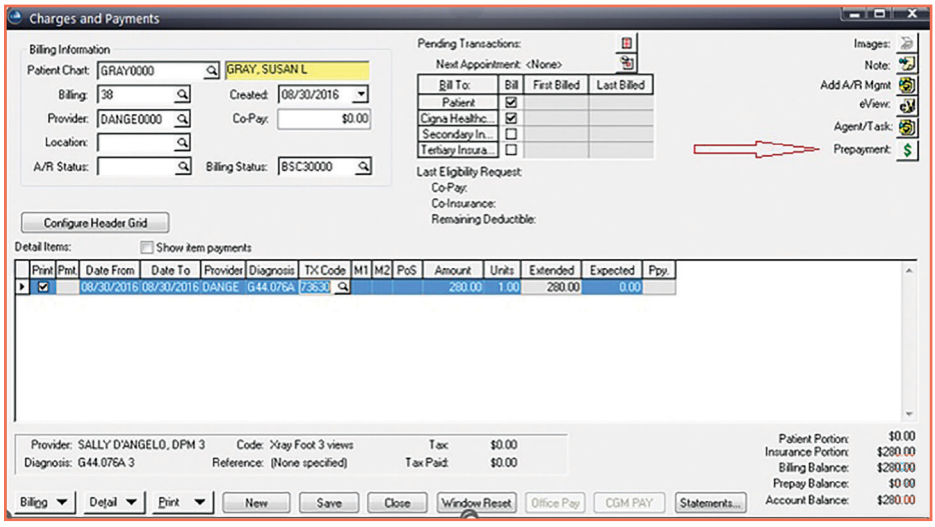

Enter a prepayment directly from Charges and Payments. There's no need to switch screens mid-task.

Patient images, right from the schedule

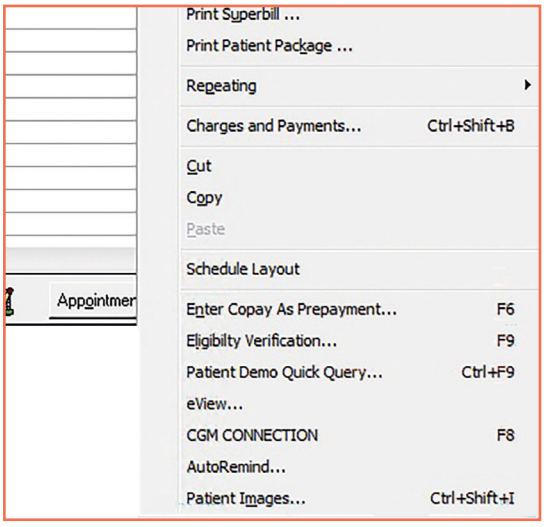

Pull up a patient's images—a quick insurance card check or something on file from a prior visit—without ever leaving the schedule.

Assign a default provider to a schedule resource and the right provider will be set automatically from then on

Enter a prepayment directly from the charges and payments screen—no need to switch screens mid-task

Pull an insurance card check or view a file from a prior visit directly from the schedule

Beyond what's new: the complete picture

New features are only part of the story.

CGM LYTEC offers a set of established tools built to support your practice well beyond day-to-day charge entry:

- **Accounts Receivable Tracker:** Use this tracker to manage working AR balances every day
- **Insurance Timely Filing Calculator:** Don't let deadlines catch your billing team off guard
- **Patient Intake Tool:** Accommodate staff on the go and mobile devices with CGM LYTEC Mobile and this helpful functionality

Supporting the patient journey

With options for complementary software and services, **CGM LYTEC** connects to a broader ecosystem built around the needs of your practice and, most importantly, your patients.

- Interface to a full EHR with an award-winning solution such as **CGM APRIMA**
- Reduce no-show rates and keep patients engaged between visits with **CGM CONNECTION** for appointment reminders and patient outreach
- Connect through **eMEDIX**—the only approved and fully supported clearinghouse for **CGM LYTEC**—for statement delivery, electronic claim attachments, and faster patient payments with **CGM PAY**
